4.1 LDS Vision

Vision for Rural Development Programme

To develop sustainable rural communities throughout County Cavan, through the provision of a programme that will enhance the social, natural, human, physical and financial resources available to individuals and communities and thereby make Cavan 2020 a place that we can be proud of a place where people can have a good quality of life; a better place to live work and to enjoy.

4.2 Local Objectives & Strategic Actions (Programme Themes & Sub Themes)

Job Creation and Employment Opportunities

Within each action there is a note of the number of longer term job opportunities expected to be created as a result of the activities of the programme and in addition to this there is a reference to the number of jobs expected to be created or sustained during the period of construction or installation work. The calculation for these shorter term construction capital related jobs is based upon research by the Association of Researchers in Construction Management (ARCON) their research can be viewed at www.arcon.ac.uk and they conclude that for every £75,000-00 sterling expended one full time job equivalent is created for the duration of the works being undertaken. Taking the euro equivalent to be approximately €100,000-00 at current rates of exchange and limiting the application to the expected construction type works envisaged this would mean that this programme would create a further additional forty five construction related jobs for the duration of the particular works over the lifetime of the strategy. However in the absence of the relevant social clauses which while available under European Law have not been adopted by Ireland at this time it is more difficult to be certain as to the extent that this will contribute to employment and job opportunities in the local area.
